## FRUIT DATA SHEET

### Strawberry 007

Strawberry varieties

The "Queen of the berries" - as it is often defined due to its incomparable taste - was discovered about two hundred years ago. Through breeding, varieties were obtained which resist in almost every climatic condition and can be grown at the most various altitudes.

We process mainly „Chandler“, „Tudla“, and „Camarosa“ from Italy and Spain and we use also „Senga Sengana“ from Poland. Other varieties include „Cartuno“, „Addie“, „Idea“, „Belrubi“, „Karola“.

Growing areas

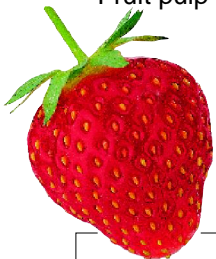

USA, Italy, Spain, Poland, Japan, Korea, but in general all over the world.
