FRUIT DATA SHEET

Mango 018

Mango varieties

There are over one thousand mango species obtained from seedlings or mutations but only about 20 of them are available on the market since mangoes are extremely delicate to transport.

Important varieties include „Alphonsos“ (the West Indies), „Bennet“, „Irwin“ (Central and South America, East Africa). From the Philippines we have the varieties „Manila“ and „Carabao“, which are very juicy and sharp, with a special, balanced aroma.

Growing areas

India, South and South East Asia, Brazil, Australia, Madagascar, East Africa, Central America, Florida, South Africa, Israel, Cyprus, Egypt.

Our strengths

- Good contacts with the producers
- Specifically tailored processing technologies

Available as:

- Clear fruit concentrate 65, 67 and 70 Bx
- Fruit puree concentrate 28 Bx
- Fruit puree 15 Bx
