FRUIT DATA SHEET

Lemon 035

Lemon varieties

Lemons thrive best in subtropical areas since they need temperatures as balanced as possible. During ripening they need cooler nights to fully develop their bright yellow colour.

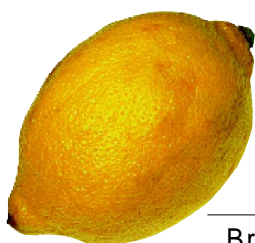

The main varieties are: „Eureka“, „Verna“, „Genua“, „Primofiori“, „Lisbon“, „Meyer“. These names are not indicative for they do not tell much to the market since lemons are mainly known and traded based on their country of origin.

Growing areas

Italy (Sicily and Calabria), Turkey, Greece, Spain, USA (California and Florida), Mexico, Argentina, Brazil, Chile.

Available as:
