# We offer **many years of experience** and a wide range of products

Our all-in-one solutions are tailored and specifically developed on our client requirements in collaboration with our internal R&D department. By using our natural origin ingredients (e.g. purees, juice concentrates, extracts and flavours) we create the perfect solution for you.

#### **Bottles & Jars**

With our bottling line (hot-filling) we can provide both beverages in bottles, or babyfood in jars. We are used at working closely with international, high-demanding clients and we can put at your service our experience to find together the best recipe, package and format for your idea

#### **Pouches**

Initially thought for dense products (especially purees for babyfood), they are also a valid packing solution for liquids and as an alternative for products in glass, definitely more practical to carry around. High quality standards are guaranteed and so is the variety of recipes we can propose, due to our extensive knowledge of handling fruit-based products in different grades (conventional, organic, spray controlled, babyfood, demeter).

#### Cups

Our latest packaging solution for the perfect snack on the go. You choose whether with, our without topping, single cup or packed in clusters: it's definitely the best way to have a healthy break in the morning or in the afternoon.
